

CL-750

DESCRIPTION

The condenser microphone designed especially for the mid-high frequency range, it is particularly well-suited for amplification and recording of such instrument as acoustic guitar, piano, strings etc.

It has an elegantly slim microphone body with the flexibility of easily interchangeable capsules, giving a choice of pick up patterns (cardioid, super-cardioid and omni-directional) to meet your sound reinforcement needs. One set of it is all three capsules with a single microphone body.

FEATURES

- . Wide frequency response, with specific elevation at medium and high frequency sections, good instant response.
- . High sensitivity, wide dynamic range, low distortion.
- . Reliable screw connection between capsule and body, three polarities available by the changing of capsules.
- . Exquisite coloration , particularly beneficial to miking and recording for alt musical instruments.
- . Supplied with Mic holder and windscreen in a convenient carry case.
